COBE PERFORMANCE CENTER
7000 ASHAWAY
MEMPHIS, TN. 38119

Dear Mr. Weisberg.

I hope this letter finds both you & Mrs. Weisberg feeling well. I have been studying the HSCA volumes and just completed Robert Blatney's book A PLOT TO KILL THE PRESIDENT, and thought it an important recognition of what you've been saying for 19 years.

I have developed a computer program that will catalog all photographic exhibits of the Warren Commission & House Select Committee. It will then list by various criteria these exhibits, such as subject matter, exhibit number, etc. I know there are many valuable photos that exist that are not part of the WC record 272 group. Would you consider making those photographs that you possess available for my research, to catalog and make a photographic copy for a permanent library of photo exhibits? It would mean a visit to Frederick and me trying very hard to not disturb you or your routine - and maybe I could give that Dodge of yours a good tune-up for the winter! Thank you for considering my request.

Sincerely,

Bob Benin

P.S. I misplaced Paul Hook's
ADDRESS - could you supply
that to me
once again?

A TRADITION OF QUALITY

Dear Bob,

9/14/82

Please excuse the haste but I'm still deep in affidavits. Of course you can copy any pix I have. However, I can't remember all of them of the earlier period and I believe they are filed by subject. Like clothing, bullets, etc. What I've gotten from the FBI more recently is in one drawer in the basement.

Dick Sprague, 193 Pinewood Road, Hartsdale, N.Y. 10530 has up quite a list of pictures he'd located some years ago. I have that list. But if he has updated it I don't and for a while he was an ESCA consultant on pix.

Hoch is 1525 Acton, Berkeley, CA. #/ 94702.

I don't know how you can copy movies.

I suppose the old boat can always use a tuneup but I don't drive it much and I think I had one this spring, with new plugs. Thanks.

If you can figure out what causes intermittent noise, some motor connected, in the radion, including FM sometimes, I'd sure like that. I've had it "fixed" twice, even had a new aerial put on, to no avail. Some of it began right after a tuneup a year or so ago.

Sprague, who has some computer connection, may have started a project like yours. You might ask him.

In the suit for the Dallas records the FBI has dropped the pretense that it complied by providing me xeroxes and is willing to provide some 8 x 10 glossys. Have you any knowledge of the pix the Dallas and New Orleans offices had?

When you get to my New Orleans (Garrison) pictures you'll have to ask me because although many have their names on the back they have no connection. Merely used to test probity of witnesses.

Best to Dandy,

Regards,
